

ABSTRACT OF THE DISCLOSURE

*See
p. 41*

An information processing system comprises:
information providing electronic parts 11 capable of reading
information in an electromagnetic or optical manner, the parts
being attached to an entity 2 in order to provide information
associated with the entity 2; a hand held terminal device 30
with its information read function that reads information from
the information providing electronic parts 11 in an
electromagnetic or optical manner and record the information;
and an information processing unit 5 for reading and
processing the information recorded in this hand held terminal
device 30.

In this way, in the case where an information user
attempts to obtain information associated with an entity such
as commodity or advertising material, the information can be
electronically recorded momentarily and processed.
